In This Brief

Spread the News: The Weekly National Park System Report is Now Available to Coalition Members

The Coalition to Protect America’s National Parks has added a new member service - a weekly newsletter on news and incidents occurring within the National Park System.

Many of you were regular readers of the National Park Service Morning Report, which was disseminated throughout the agency from 1986 until it was terminated in 2015. Bill Halainen, who was editor of that publication, is now producing a similar report called The Weekly National Park System Report exclusively for members of the Coalition.

Please share the good news about The Weekly National Park System Report and encourage friends and family who are current, retired, or former salaried (GS, Wage System, seasonal, temporary, or SES) employees of the National Park Service to join our membership and gain access to the report.
Coalition Statement on President's Recent Executive Order

The Coalition to Protect America’s National Parks is strongly opposed to the recent Executive Order signed by President Trump ordering a review by the Department of the Interior of national monuments established by presidents since 1996 to determine if the boundaries need to be changed or other modifications made.

The Coalition urges the Secretary Zinke to fulfill his promises to the American people to protect those places we most value and resist the efforts of a few to make a profit from our public lands. We believe that our parks and public lands represent the very best of America, and advocate for their protection.

**Shutdown**

While numerous valuable programs and people would be negatively impacted by a shutdown, we are particularly concerned about the impact on our national parks, national wildlife refuges, national fish hatcheries, resource conservation areas, national forests, and other special lands and waters where people visit and recreate.

Click below to see our letter of concern about the impact of a federal government shutdown to the President and Congress.

**NPS "9B" Oil and Gas Regulations**

Protect Parks

A recent order issued by new Secretary of the Interior Ryan Zinke could result in a major rollback of the NPS “9B” oil and gas regulations and lead to significant increases in drilling for oil and gas in 42 parks.

Click below to read our letter of concern to Secretary Zinke.

**Op-Ed: Interior Secretary Zinke, Protect Our National Parks**

A recent Secretarial Order would rollback numerous environmental regulations, including the NPS “9B” oil and gas regulations, which protect park resources.
from adverse impacts caused by energy extraction activities on public lands near or within parks.

Click below to see our op-ed about the Secretarial Order originally published in *The Hill*.

**What We're Reading This Month**

- Don't miss Phil Francis discussing the $11.9 billion backlog of park maintenance in a new episode of "After the Fact" from the Pew Charitable Trusts with host Dan LeDuc. Listen to the podcast [by clicking this link.](#)

- On April 19th, Secretary Zinke announced that 2016’s record visitation of 331 million visitors at America’s 417 National Park Service sites contributed $34.9 billion to the U.S. economy in 2016 - a $2.9 billion increase from 2015. “This report is a testament to the tangible economic benefits our parks bring to communities across the nation. Visitation numbers continue to rise because people want to experience these majestic public lands,” Zinke said. Read more [by clicking this link.](#)

- World Heritage Day was celebrated this past month on April 18th. From acting National Park Service Director Michael T. Reynolds, "Building on the centennial of the National Park Service in 2016 and the fiftieth anniversary of US/ICOMOS the year before, World Heritage Day 2017 is the perfect time to remind Americans and people worldwide of the tradition of U.S. leadership in stewarding the world’s cultural heritage, especially the global heritage sites we protect and enjoy right here in the United States." Read more [by clicking this link.](#)

- In an article for *Travel Weekly*, Maureen Finnerty discussed the President's budget blueprint: "Never before have cuts of this magnitude been made. These cuts are extreme and will result in the degradation of park resources owned by all Americans. These cuts will impact economies of local communities and businesses as parks will be forced to close facilities and shorten visitor seasons. For every dollar spent on
park operations, more than $10 is returned to local communities, which provides critical jobs for thousands of Americans." Read more [by clicking this link].

-From the New York Times: "As our population grows and our rich natural and historical heritage faces increasing threats, we should be looking to protect more places that can inspire and inform present and future generations and offer them recreational opportunities. That is the incomparable legacy of the Antiquities Act, and its necessity is as vital today as it ever was. It would be shortsighted in the extreme for Congress to change a single word of what has been, by practically every measure, one of the most fruitful and farsighted laws it has ever put on the books."
