Coalition News

As the Coalition continues to monitor agency plans for expanded mining, oil and gas extraction, and other activities that could harm public lands, we continue to build support for healthy public lands across the country.

Advocacy Actions

Several high profile bills are on the horizon:

- The Coalition recently sent detailed comments on oil and gas leases on the Colorado Resource Leasing Priority Area and federal land in the Montana-Dakotas region to the Bureau of Land Management. The Coalition also supported attrition of the pending NPS Experimental Natural Area at Mount Whitney, California. The Coalition also supported the NPS Experimental Natural Area at Mount Whitney, California. The Coalition also supported the NPS Experimental Natural Area at Mount Whitney, California.

- The Coalition continues to advocate for increased protections for public lands in the Castlewood Canyon State Park, Colorado. The Coalition also supported the NPS Experimental Natural Area at Mount Whitney, California. The Coalition also supported the NPS Experimental Natural Area at Mount Whitney, California.

On the Horizon

Here is a look at some of the work we’ll be pursuing in July:

- Continuing the 30th anniversary celebration with testimonials from EC members, past and present, about serving on the EC.
- Opening Executive Council meeting with a discussion about conservation and land management in the context of climate change. This critical topic is both timely and relevant for public lands.
